THE NEW ILLINOIS

We accommodate

1972 EDITION

ILLINOIS

STATE AND REGIONAL
ECONOMIC

DATA BOOK

In 1970, the Department of Business and Economic Development established a long needed precedent by publishing the first Illinois Regional Economic Data Book, a concise and accurate reflection of the factors which make up Illinois' complex economy. Simultaneously, the book established a second precedent by studying the State's economy on the basis of distinct economic regions.

As in 1971, the Department has now repeated the Data Book, with expanded and updated information. The facts contained herein are vital to the planning and development of our social and economic programs, and I urge all who are involved in such programs to read and digest the material presented.

Sincerely,

Richard B. Ogilvie
Governor

Illinois, situated in the center of the richest and most productive nation in the world, is ideally located for the acquisition of raw materials and the distribution of finished goods. Enhancing the State's appeal as a business site are its own natural resources, its unmatched transportation network, its proximity to major domestic markets and its access to over-seas markets. Thus, it has not been by chance that Illinois has become home to over 200,000 manufacturing and non-manufacturing companies.

But, future prosperity cannot be left to chance, and the present Administration of the State of Illinois is constantly studying the State's economy with the ever present goal of raising the economic level of each of its citizens.

We invite investors to use this survey of the Illinois economy to compare our state with any other as a potential business location. We feel Illinois will prove to be the best choice.

Sincerely,

Ray C. Dickerson

INTRODUCTORY NOTE

This handbook is the third edition of a book first published in 1970 by the Department of Business and Economic Development as a general reference for use by those interested in investing in a business or industrial plant in the State of Illinois.

In this edition, a new set of regions (different from those used in the earlier editions of the book) has been demarcated for the purpose of regional data presentation, due to the establishment by Executive Order in 1971 of an official regional framework for State planning and administration (see map on page 9).

The tables presented in this 1972 edition represent the most recent and suitable data available. Some revisions of historical series (shown in earlier editions) have been made due to the availability of improved data, and some new material has been added.

The material in the book is presented in two parts, the first of which includes statistical information pertaining to the economy of the entire State (with some regional comparisons). The second part presents regional economic data separately for each of the eleven regions established for the purposes of the book.

In the tables shown in the book, details may not add to totals due to rounding. In the columns of the tables, hyphens represent zero (unless otherwise indicated), NA indicates data not available or not applicable, and (D) indicates data withheld to avoid disclosure of the operations of individual firms.

STATEWIDE SUMMARY

A State account comparable to "Gross National Product" was not developed for presentation in earlier editions of this book because some types of data used in preparation of the national account have not been available for the "open" economies of states. However, due to many requests, the Department of Business and Economic Development now estimates Gross State Product on both an annual and quarterly basis, and the annual estimates are herein presented for recent years through 1971. The method used in making the estimates rests on the development by the U. S. Department of Commerce of estimates of Gross National Product by industry, and the application of comparative U. S. and State nonfarm earnings data published by Commerce, along with farm income data for the State published by the U. S. Department of Agriculture. The method is now being used for the preparation of GSP estimates in some other states (by the Federal Reserve Bank of Boston for the New England states, for example).

In addition to the Gross Product tables, tables showing Total Personal Income for the State and regional comparisons are presented. Total Personal Income is the current income (for the year given) of persons in the State from all sources. It is measured before deductions of income and other personal taxes, but after deduction of personal contributions to Social Security, government retirement, and other social insurance programs. It includes income received from business, Federal and State and local governments, households and institutions, and foreign countries. It consists of wages and salaries (in cash and in kind and including tips and bonuses as well as contractual compensations), various types of supplementary earnings termed "other" labor income (the largest item being employer contributions to private pensions and welfare funds), and the net incomes of owners of unincorporated businesses (farm and

nonfarm), including the incomes of independent professionals, net rental income, dividends, interest, and government and business transfer payments (consisting in general of disbursements to persons for which no services are rendered currently, such as unemployment benefits, Social Security payments, and welfare and relief payments).

In addition to the Gross Product and Personal Income tables, the Statewide section contains tables relating to the State's manufacturing sector and pattern of trade in manufactures, plus materials pertaining to agricultural and mineral production, the transportation network, employment and wages, population, and State and local taxes related to personal income.

The key to the symbols on the materials (maps) pertaining to the State's transportation network can be found at the end of the Regional note below.

REGIONAL DATA

As in earlier editions, Basic Income tables are presented in this book as the key tables for each Region. Basic Income is income derived largely from sources outside the region -- through the sale of local products and services to the rest of the State, Nation or World (and to visitors who come from these outside areas), or through the location in the region of facilities (such as a university) or the local impact of programs (such as Social Security) which are funded on a Statewide or Nationwide basis -- and which enables the region to "import" from the rest of the State, Nation or World the many goods and services which it needs but does not produce. Basic income is only a portion of total regional personal income (roughly half, in most regions), but it is significant to planning for investment in a business or industrial plant because, over time, its level is the bellwether of regional economic activity, total personal income,

and (considered within the framework of general birthrate trends) population growth or decline. (Note that these Basic Income tables could not appropriately be summed for the State as a whole -- e.g., State Government accounts for a substantial amount of GOVERNMENT income in the Springfield Region which comes from outside the Region in the form of State taxes, but for the State as a whole, income from State Government comes largely from within the State.)

In this 1972 edition, the Basic Income tables represent revisions of the tables presented in earlier editions. The new tables are to a large extent derived from the Personal Income accounts (shown separately) now being prepared annually for Standard Metropolitan Statistical Areas and non-SMSA counties by the Office of Business Economics, U. S. Department of Commerce.* The revisions have resulted generally in a downward adjustment of basic income from AGRICULTURE, and a substantial downward adjustment in basic income from VISITORS in some Regions (this latter due to the recent availability of improved hotel-motel receipts data).

The six basic income elements used in earlier editions have been retained in this book (but notes are provided concerning other elements which are believed to be of some significance). It should be noted that the six elements fall short of representing total basic income in the Chicago Region. In this Region, other elements (large business headquarters' operations, for example) account for a large portion of the total. Also, in this Region a portion of some of the elements shown in the table for the Region (such as MANUFACTURING) is probably attributable to local, rather than outside consumption. The Chicago Region

*Data in these accounts are available for presentation through 1969. The 1970 Basic Income figures shown are estimates prepared by the Department of Business and Economic Development through the application of collateral data.

table should, therefore, be viewed with consideration for the large market and complex economy which the Region represents.

It should also be noted that the basic income figures in the tables are based mainly on data reported by "place of business" rather than by "place of residence," thus portions of this income are apt to be supporting some economic activity (and population) outside the region (as in the case of the Rock Island Region). In other cases, a region located near another which has a large urban center is apt to be experiencing economic (and population) growth attributable to the basic income growth of the large urban center (as in the cases of the East St. Louis and Quincy Regions).

As in the Statewide Summary, Total Personal Income tables (see page 2) are shown for each region. Also presented for each region are materials related to population, manufacturing, water supply and agricultural and mineral production, and employment and wages, as well as data for individual communities on housing, municipal finances and transportation facilities and services.

In the community transportation tables, abbreviations are used to designate airlines, railroads and barge companies, and codes are used to designate the general types of commodities which can be handled by the public and private terminals at the river ports (it should be noted that the data on river ports is as of 1967, and that changes may have occurred since that date which would not be reflected in the tables). The keys to the abbreviations and codes are given below.

(Airlines)

AA	American Airlines
AAA	Allegheny Airlines
AC	Air Canada

AF	Air France
AI	Air Illinois
AIR	Airco
AJ	Air Jamaica
ALIT	Alitalia Airlines
AM	Air Michigan

	All manufacturing, total	17,548	9,951	3,193	1,811	1,527	603	463	

*In this table, data are not shown separately for any industry which does not have at least 100 employees or 10 reporting units in the State. However, data for an unpublished industry are included in the total shown for the broader industry group of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry are included in the tabulations in a broader kind-of-industry group.

The figures in this table include corrections made by the U. S. Bureau of the Census subsequent to the issuance of their official count of 11,113,976 for the State (as of April 1, 1970), thus the State total for 1970 shown above differs slightly from the official count shown in the Age Distribution table.

*Number of children under five per 1,000 women between the ages of 15-49.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

Seaport of Chicago

Note: There are 42 steamship companies with regular service to the Port. The Port has 18 overseas terminals and grain elevators. Tonnage data for 1969 and 1970 for the Port are as follows:

Tonnage Handled by Port (in millions)					
Total	1969 Foreign	Domestic	Total	1970 Foreign	Domestic
46	6	40	48	7	41

For additional information regarding the extensive seaport facilities in the Chicago Metropolitan Area, contact the Manager, Transportation Services, Department of Business and Economic Development, 205 West Wacker Drive, Chicago, Illinois, 60606.

*See Introductory Note on page 5 for key to airline, railroad and bargeline abbreviations and to commodity group codes.

**Data on river transportation facilities for individual cities in the Chicago Metropolitan Area (Lake, Henry, Will, DuPage, Cook, and Kendall Counties) are not available in the data sources used for this report. The terminal facilities shown in the table above are all terminals along the Illinois River within the six-county area -- without reference to specific locations. The data on terminal facilities and bargelines are for 1968, since more recent data are not available.

Source: These data were compiled from the files of the Department of Business and Economic Development and from various published and unpublished materials from the Illinois Highway Study Commission, Illinois Department of Aeronautics and the Transportation Institute of Southern Illinois University.

CHICAGO
REGION

ROCKFORD REGION

ROCKFORD REGION - BASIC INCOME: THE FOUNDATION OF THE ECONOMY (those portions of Total Personal Income, by source, which are generally derived from outside the Region*)

	<u>1950</u>	<u>1959</u>	<u>1965</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
ALL ELEMENTS, TOTAL**	\$464.3	\$700.9	\$984.3	\$1,179.5	\$1,225.5	\$1,346.9	\$1,372.1
	(figures in millions)						
AGRICULTURE.	168.2	179.5	227.6	224.8	198.1	230.4	227.6
MANUFACTURING.	244.8	418.4	600.5	749.4	788.7	848.0	834.4
MINING	1.6	3.3	4.0	4.5	5.0	5.1	5.2
GOVERNMENT	14.3	23.5	42.6	62.4	74.6	85.1	97.2
VISITORS	6.7	11.1	15.9	17.5	19.9	24.4	26.3
TRANSFER PAYMENTS.	28.7	65.1	93.7	120.9	139.2	153.9	181.4

*The figures in this table represent revisions of those presented in earlier editions of the Data Book, and are linked to the accompanying Total Personal Income table as follows: AGRICULTURE consists of all (net) "farm earnings" plus an estimated portion of trade, services and other "private nonfarm earnings" attributable to farm production expenditures made locally; MANUFACTURING and MINING consist of all "manufacturing earnings" and "mining earnings," respectively; GOVERNMENT consists of all "Federal Government earnings" plus an estimated State portion of "State and Local Government earnings"; VISITORS consists of an estimated portion of trade, services and other "private nonfarm earnings" attributable to the expenditures of overnight visitors to the Region; and TRANSFER PAYMENTS consists of all "transfer payments."

**Property income from outside the Region is believed to be a significant additional Basic Income element here, but data concerning its actual magnitude are lacking. Application of a location quotient (comparing the Region's income pattern with that of the U. S.) suggests that this element may have amounted to as much as \$30 million in 1970.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

PEORIA
REGION

PEORIA REGION - BASIC INCOME ELEMENTS IN CONSTANT DOLLARS*

*Adjusted for inflation on the basis of changes in the U. S. Consumer Price Index (1967 = 100).

PEORIA REGION - BASIC INCOME: THE FOUNDATION OF THE ECONOMY (those portions of Total Personal Income, by source, which are generally derived from outside the Region*)

	<u>1950</u>	<u>1959</u>	<u>1965</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
				(figures in millions)			
ALL ELEMENTS, TOTAL**	\$511.6	\$709.3	\$924.1	\$1,037.7	\$1,086.0	\$1,177.4	\$1,259.7
AGRICULTURE	142.5	142.0	195.0	196.8	165.1	194.8	195.8
MANUFACTURING	285.6	430.6	540.1	603.3	650.8	691.9	735.5
MINING	12.9	16.9	20.5	22.4	24.3	25.9	28.0
GOVERNMENT	18.1	27.1	39.3	50.8	56.5	62.2	68.1
VISITORS	14.0	19.0	24.2	27.0	30.8	28.9	30.5
TRANSFER PAYMENTS	38.5	73.7	105.0	137.4	158.5	173.7	201.8

*The figures in this table represent revisions of those presented in earlier editions of the Data Book, and are linked to the accompanying Total Personal Income table as follows: AGRICULTURE consists of all (net) "farm earnings" plus an estimated portion of trade, services and other "private nonfarm earnings" attributable to farm production expenditures made locally; MANUFACTURING and MINING consist of all "manufacturing earnings" and "mining earnings," respectively; GOVERNMENT consists of all "Federal Government earnings" plus an estimated State portion of "State and Local Government earnings"; VISITORS consists of an estimated portion of trade, services and other "private nonfarm earnings" attributable to the expenditures of overnight visitors to the Region; and TRANSFER PAYMENTS consists of all "transfer payments."

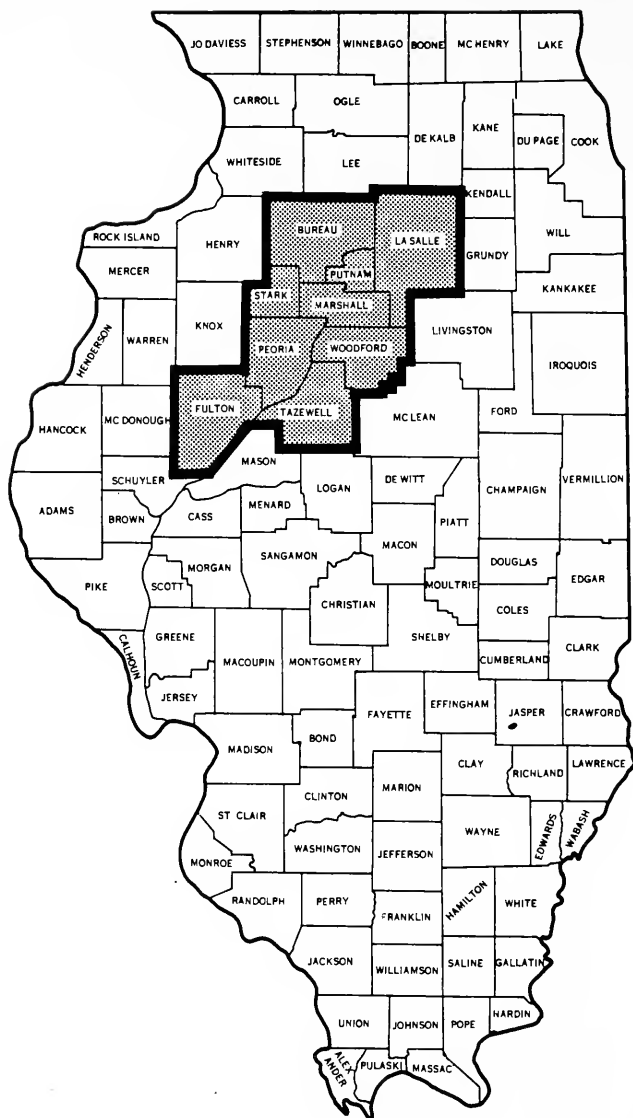

**Property income from outside the Region is believed to be a significant additional Basic Income element here, but data concerning its actual magnitude are lacking. Application of location quotients (comparing the Region's pattern with that of the U. S.) suggests that this element may have amounted to nearly \$50 million in 1970--and that some Basic Income was attributable to the construction and finance-insurance-real estate sector as well.

DECATUR REGION

DECATUR REGION - BASIC INCOME: THE FOUNDATION OF THE ECONOMY (those portions of Total Personal Income, by source, which are generally derived from outside the Region*)

	<u>1950</u>	<u>1959</u>	<u>1965</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
ALL ELEMENTS, TOTAL**	\$234.4	\$332.9	\$452.1	\$520.2	\$540.0	\$595.5	\$646.9
	(figures in millions)						
AGRICULTURE.	116.8	102.6	156.9	159.2	135.7	156.4	143.4
MANUFACTURING.	66.8	141.9	195.0	233.4	258.2	277.1	293.8
MINING	4.0	7.3	4.0	4.0	4.6	4.9	5.3
GOVERNMENT	15.7	24.5	24.0	32.1	38.2	43.3	48.6
VISITORS	6.6	9.3	7.8	6.9	7.7	9.9	10.9
TRANSFER PAYMENTS.	24.5	47.3	64.4	84.6	95.6	103.9	144.9

*The figures in this table represent revisions of those presented in earlier editions of the Data Book, and are linked to the accompanying Total Personal Income table as follows: AGRICULTURE consists of all (net) "farm earnings" plus an estimated portion of trade, services and other "private nonfarm earnings" attributable to farm production expenditures made locally; MANUFACTURING and MINING consist of all "manufacturing earnings" and "mining earnings," respectively; GOVERNMENT consists of all "Federal Government earnings" plus an estimated State portion of "State and Local Government earnings"; VISITORS consists of an estimated portion of trade, services and other "private nonfarm earnings" attributable to the expenditures of overnight visitors to the Region; and TRANSFER PAYMENTS consists of all "transfer payments."

**Property income from outside the Region is believed to be an additional Basic Income element of some importance here, but data concerning its actual magnitude are lacking. Application of a location quotient (comparing the Region's income pattern with that for the U. S.) suggests that this element may have amounted to about \$6 million in 1970.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

SPRINGFIELD REGION

SPRINGFIELD REGION - BASIC INCOME: THE FOUNDATION OF THE ECONOMY (those portions of Total Personal Income, by source, which are generally derived from outside the Region*)

	1950	1959	1965	1967	1968	1969	1970
ALL ELEMENTS, TOTAL**	\$302.1	\$365.0	\$506.3	\$589.9	\$610.8	\$681.6	\$736.4
(figures in millions)							
AGRICULTURE.	139.3	121.7	179.0	183.5	160.1	187.3	185.2
MANUFACTURING.	58.6	108.5	132.1	152.7	162.1	175.7	193.3
MINING	34.9	10.5	16.1	19.9	19.4	20.9	21.9
GOVERNMENT	31.3	53.4	78.1	100.9	117.8	136.2	152.8
VISITORS	6.6	10.1	18.7	22.7	25.8	24.9	26.8
TRANSFER PAYMENTS.	31.4	60.8	82.3	110.2	125.6	136.6	156.4

*The figures in this table represent revisions of those presented in earlier editions of the Data Book, and are linked to the accompanying Total Personal Income table as follows: AGRICULTURE consists of all (net) "farm earnings" plus an estimated portion of trade, services and other "private nonfarm earnings" attributable to farm production expenditures made locally; MANUFACTURING and MINING consist of all "manufacturing earnings" and "mining earnings," respectively; GOVERNMENT consists of all "Federal Government earnings" plus an estimated State portion of "State and Local Government earnings"; VISITORS consists of an estimated portion of trade, services and other "private nonfarm earnings" attributable to the expenditures of overnight visitors to the Region; and TRANSFER PAYMENTS consists of all "transfer payments."

**Property income from outside the Region is believed to be a significant additional Basic Income element here, but data concerning its actual magnitude are lacking. Application of location quotients (comparing the Region's income pattern with that for the U. S.) suggests that this element may have amounted to nearly \$15 million in 1970--and that some Basic Income was attributable to the transportation-communication-utilities sector as well.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

EAST ST. LOUIS REGION

EAST ST. LOUIS REGION - BASIC INCOME: THE FOUNDATION OF THE ECONOMY (those portions of Total Personal Income, by source, which are generally derived from outside the Region*)

	<u>1950</u>	<u>1959</u>	<u>1965</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
	(figures in millions)						
ALL ELEMENTS, TOTAL**	\$383.5	\$610.3	\$758.7	\$864.1	\$911.7	\$1,002.0	\$1,050.7
AGRICULTURE.	64.4	64.0	73.0	76.6	72.0	81.6	79.7
MANUFACTURING.	219.7	366.0	439.7	473.0	484.9	532.5	524.6
MINING	14.2	21.5	22.1	21.0	20.8	21.2	20.4
GOVERNMENT	37.3	63.0	84.2	114.4	128.4	142.0	157.4
VISITORS	5.6	9.0	13.2	14.5	16.5	19.5	18.2
TRANSFER PAYMENTS.	42.3	86.8	126.5	164.6	189.1	205.2	250.4

*The figures in this table represent revisions of those presented in earlier editions of the Data Book, and are linked to the accompanying Total Personal Income table as follows: AGRICULTURE consists of all (net) "farm earnings" plus an estimated portion of trade, services and other "private nonfarm earnings" attributable to farm production expenditures made locally; MANUFACTURING and MINING consist of all "manufacturing earnings" and "mining earnings," respectively; GOVERNMENT consists of all "Federal Government earnings" plus an estimated State portion of "State and Local Government earnings"; VISITORS consists of an estimated portion of trade, services and other "private nonfarm earnings" attributable to the expenditures of overnight visitors to the Region; and TRANSFER PAYMENTS consists of all "transfer payments."

**Property income from outside the Region is believed to be a significant additional Basic Income element here, but data concerning its actual magnitude are lacking. Application of location quotients (comparing the Region's income pattern with that for the U. S.) suggests that this element may have amounted to over \$20 million in 1970--and that some Basic Income in earlier years was attributable to the construction and transportation-communication-utilities sectors.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.
